SUBJECT INDEX TO VOLUME 56

Amine oxidase, purification/characterization of equine plasma, 127
Antitumor activity
  platinum(II) complexes, 143
  Pt-dipyridamole salt, 233
Ascorbate, peroxynitrite reaction with, 77
Ascorbyl radicals, generation of, 77
Azathioprine, complexes of, 249
Bismuth colloid, erythrocytes and, 283
Carbohydrates, complexation behavior of, 243
Cell lysis, vanadium in ascidians and, 97
Chromium toxicity, in *Neurospora crassa*, 87
Ciprofloxacin, synthesis/characterization/crystal structure of copper(II) complex with, 273
Circular dichroism, of deoxyadenosine and thymidine monomers and dimers, 201
Coenzyme B_{12} analogues, anaerobic photolysis products of, 265
Collodial metals, interaction with erythrocytes, 283
Copper accumulation, metallothionein and, 117
Copper(II)
  equine plasma amine oxidase, purification/characterization of, 127
  uracil- and hypoxanthine-derived nucleotides, 187
Copper(II) complex
  bis(1-cyclopropyl-6-fluoro-1,4-dihydro-4-oxo-7-piperazin-1ylquinoline-3-carboxylate) copper(II) chloride hexahydrate, 273
  dichloro-disulfathiazole ethanol, crystal structure of, 65
Deoxyadenosine, circular dichroism of, 201
Dichloro-disulfathiazole ethanol copper(II) complex, crystal structure of, 65
cis-Dichlorodiammineplatinum(II), metallothionein and, 143
trans-Dichlorodiammineplatinum(II), metallothionein and, 143
2',5'-Dideoxynucleosidyl radicals, formed from anaerobic photolysis of 2',5'-dideoxynucleosidylcobalamins by, 265
2',5'-Dideoxynucleosidylcobalamins, 2',5'-dideoxynucleosidyl radicals formed from anaerobic photolysis of, 265
Electron paramagnetic resonance (EPR) spectroscopy, vanadium in ascidians, 97
Electron spin resonance spin trapping
  2',5'-dideoxynucleosidyl radicals formed from anaerobic photolysis of 2',5'-dideoxynucleosidylcobalamins by, 265
  free radical generation in sulfite, 155
Equine plasma amine oxidase, purification/characterization of, 127
Erythrocytes, collodial metals interaction with, 283
Factor analysis, of spectrophotometric titration, 213
Ferritin, horse spleen, iron core formation in, 173
Free radicals, sulfite and, 155
Glycinate ion, spectrophotometric titration of nickel(II) by, 213
Gold colloid, erythrocytes and, 283
Heme iron stereochemistry, oxyhemoglobin Mössbauer spectra and, 221
Hepatic carcinoma, metallothionein and copper in, 117
Hepatitis, metallothionein and copper in, 117
High performance liquid chromatography, free radical generation in sulfite, 155
Horse spleen ferritin, iron core formation in, 173
Hydrogen ions, interaction with nucleic acids, 187
Iron core formation, in horse spleen ferritin, 173
Lanthanide ions, Transferrin Metalloprotein Affinity Metal Chromatography and, 167
Liver, metallothionein and copper in, 117
Mercaptopurine derivative, active, 249
Metal ions
  interaction with nucleic acids, 187
  sugar α-amino acid in complexation of divalent, 243
Metallothionein
  copper accumulation and, 117
  platinum(II) complexes and, 143
Metals, collodial, interaction with erythrocytes, 283
Mössbauer spectra, oxyhemoglobin, 221
Neurospora crassa, chromium toxicity in, 87
Nickel(II)-glycinate ion system, evolving factor analysis of spectrophotometric titration of, 213
Nucleic acids
  complexation of B-form, 201
  metal and hydrogen ions interaction with, 187
Oxyhemoglobin, Mössbauer spectra of, 221
Palladium(II), azathioprine complexes with, 249
Peroxynitrite, thiols and ascorbate with, 77
Platinum(II), azathioprine complexes with, 249
Platinum(II) complexes
  antitumor activity and toxicity, 143
  metallothionein and, 143
Plutonium(IV)-bearing solutions, decontamination of, 167
Pt-dipyridamole salt
  antitumor activity, 233
  synthesis/crystal structure/biological activity of, 233
Quinolone family member, synthesis/characterization/crystal structure of copper(II) complex with, 273
Rhodium(II), azathioprine complexes with, 249
Ruthenium(II), azathioprine complexes with, 249
Silver colloid, erythrocytes and, 283
Silver(I), azathioprine complexes with, 249
Sugar α-amino acid, complexation of divalent metal ions by, 243
Sulfathiazole, coordination behavior of, 65
Sulfite, free radicals and, 155
Sulfur dioxide, free radicals and sulfite, 155
Superoxide dismutase activity, sulfathiazole, 65
Thiols, peroxynitrite reaction with, 77
Thiyl and ascorbyl radicals, generation of, 77
Thymidine monomers and dimers, circular dichroism of, 201
Transferrin Metalloprotein Affinity Metal Chromatography, plutonium(IV)-bearing solutions, decontamination of, 167
Uracil- and hypoxanthine-derived nucleotides, acid-base behavior and copper(II) complexing properties of, 187
Vanadium in ascidians, cell lysis and, 97
